# PREFACE

This is one of a series of volumes presenting final results of the 1954 Census of Business for Selected Service, Retail, and Wholesale Trade. Statistics for the Selected Service Trades are contained in two volumes, Volume V and this volume. The 1954 Census, which was conducted by mail canvass of business establishments and by use of Internal Revenue Service records (see "Method of Enumeration" in Introduction), was authorized by law under Title 13, United States code, Section 131. Previous business censuses covered the years 1929, 1933, 1935, 1939, and 1948.

Important to the conduct of the 1954 Census of Business was the cooperation of the Bureau of Old-Age and Survivors Insurance and the Internal Revenue Service in permitting use of certain records thus making possible a material reduction in the cost of enumerating the Census. The Bureau also acknowledges the assistance of many private and public organizations in the planning phase of the census and the excellent cooperation of some 1,750,000 business establishments in completing the required Census forms.

The advice of trade associations, individual businessmen, research and marketing organizations, and government agencies was invaluable in determining the feasibility of collecting various types of data and the methods for minimizing the burden of reporting, as well as in determining the types of information which would be of greatest value. Especially helpful was the Advisory Council on Federal Reports, which through special panels of business experts advised and assisted in the development of inquiries. Because of budgetary and other limitations, it was not possible to collect all of the data recommended by these groups. Timely publicity given to the Business Census by chambers of commerce, business organizations, trade papers, local newspapers, and television and radio stations aided greatly in informing businessmen of the nature and objectives of the census and facilitated the collection of census reports.

Primary responsibility for the 1954 Census of Business program was centered in the Business Division of the Census Bureau, under the direction of Harvey Kailin, Chief of the Division. Louis Greenberg, Chief of the Service Trade Branch, supervised the service trade segment of the Business Census. He was assisted by Harry Kahan, Floyd D. McNaughton, Anna C. Miller, and Joseph E. Quillen of the Service Trade Branch who were chiefly responsible for handling technical problems.

Processing of the 1954 Census of Business reports was performed by the Economic Operations Division, under the supervision of M. D. Bingham, Division Chief, and Irving Weiss, Assistant Chief. Donald K. Weasmer, then Chief of the Retail and Service Census Branch, was responsible for processing Service Trade reports and tabulations. He was assisted by Jack A. Scharff and John S. Lannan.

In the Field Division, Jack B. Robertson, then Chief of the Division; Ivan G. Munro, Assistant Chief; and Arthur L. Cook, then Chief of the Economic Census Branch, directed the field work for the Census of Business.

Important functions were also performed by the Machine Tabulation Division under C. F. Van Aken, Chief. Mrs. Catherine M. Neafsey, Chief of the Economics Section, was responsible for machine tabulation techniques and procedures used in Service Trades tabulations.

Geography Division personnel participating in various phases of Business Census work were Clarence E. Batschelet, Chief; Robert C. Klove, Assistant Chief; and William T. Fay, Chief, Survey Planning Branch.

Donald K. Heiser, Chief of the Electronics Systems Branch, assisted by Rudolph M. Micoly, Chief of Operations for the Branch, was responsible for planning and use of electronic computer and accompanying equipment. Robert H. Brooks, Chief, Graphics Branch, was responsible for preparing Census of Business publications for reproduction. Mrs. Elma Beynon of the Statistical Reports Division reviewed all text material and table forms, and assisted on publications problems.

# INTRODUCTION

The 1954 Census of Business, along with the 1954 Censuses of Manufactures and Mineral Industries, was authorized by law under Title 13, United States Code, section 131. These 1954 Censuses covered businesses operated in continental United States, Alaska, and Hawaii. Separate Censuses of Business and Manufactures for 1954 were also conducted in Puerto Rico jointly with the Commonwealth Government.

The 1954 Census of Business covered Selected Service Trades, Retail Trade, and Wholesale Trade. This volume provides findings for that portion of the 1954 Census of Business which relates to the Selected Service Trades.

## KINDS OF BUSINESS COVERED

This report covers all establishments primarily engaged in certain Selected Service Trades, defined in accordance with the principles of the Standard Industrial Classification System, as published in Volume II, Nonmanufacturing Industries (1949 edition) of the Standard Industrial Classification Manual issued under the auspices of the Bureau of the Budget, Executive Office of the President, and subsequently amended by the Bureau of the Budget for use in the 1954 Census of Business. Of the 15 major groups included in the Service Division of the Manual, the 1954 Census of Business includes the following S. I. C. major groups essentially in their entirety:

70. Hotels, camps (rooming and boarding houses, organization hotels and lodging houses have been omitted from the Census).
72. Personal services.
73. Miscellaneous business services (accounting, auditing, bookkeeping have been omitted from the Census).
75. Automobile repair services and garages.
76. Miscellaneous repair services.
78. Motion pictures.
79. Amusement and recreation services, except motion pictures.

The following major groups of the Service Division as presented in the Standard Industrial Classification Manual are excluded in their entirety from the scope of this Census:

77. Radio broadcasting (including facsimile broadcasting) and television.
80. Medical and other health services.
81. Legal services.
82. Educational services.
84. Museums, art galleries, and botanical and zoological gardens.
86. Nonprofit membership organizations.
88. Private households.
89. Miscellaneous services.

## METHOD OF ENUMERATION

For purposes of coverage in the 1954 Census of Business, service establishments were divided into two categories—those with any paid employment during 1954, i. e., the "employer" universe; and those with no paid employment during 1954, i. e., the "nonemployer" universe. The method of obtaining Census information for these two groups was as follows:

Enumeration of "Employers."--Information for establishments having paid employees and engaged in the selected service trades was obtained by means of a mail canvass. Report forms were mailed to all business firms which were included in the active records of the Internal Revenue Service as subject to payment of Federal Insurance Contributions Act (FICA) taxes (i. e., employers of one or more persons) and which were classified in the records of the Bureau of Old Age and Survivors Insurance (BOASI) as wholly or partially engaged in retail, wholesale, manufacturing, mineral industries, and in major groups 70, 72, 73, 75, 76, 78, and 79 of the Service portion of the Standard Industrial Classification Manual. In addition, report forms were mailed to all establishments which BOASI had not classified by kind of business prior to the mailing of Census report forms. Each establishment was mailed a report form appropriate to its BOASI classification (for those cases for which BOASI classification had not yet been established, a general purpose form was used) but its 1954 Census classification was determined by replies to questions on the Census report form.

Enumeration of "Nonemployers."--This group was defined to include service businesses within the census scope other than those represented in the active FICA records of the Internal Revenue Service. Information for this group of establishments was furnished by the Internal Revenue Service and was derived from the 1954 tax returns. Information was compiled from only one-half of these cases and census results for this group were established by multiplying such findings by 2. The "nonemployer" segment of the Service Trade Census, although making up more than half the establishments, accounted for about 10 percent of the total service trade volume of receipts.

## COMPARISON OF 1948 AND 1954 CENSUSES

The 1948 and 1954 Business Censuses differed in several respects which affect to some degree the comparability of data for the service trades. The results of a study being made to evaluate these differences will be included in later publications of the 1954 Census. The more important general differences are discussed in this section. The effect on individual kinds of business is discussed in the KIND-OF-BUSINESS CLASSIFICATION section below.

(1) The 1954 Business Census excludes those service establishments with no paid employment in 1954 which had a receipts volume of less than $1,000 in that year. Previously published results of the 1948 Census excluded establishments which operated the entire year but which had a receipts volume of under $500. However, in this series of 1954 Census publications, the 1948 Census figures have been revised to the same dollar cutoff as was used in the 1954 Census. This change was made to help achieve greater comparability between the two censuses, although it should be recognized that changes in price level which have occurred between 1948 and 1954 have the effect of complicating comparisons between the two censuses. Use of the same dollar volume cutoff does not take into consideration such changes in price level. However, this situation does not importantly affect a comparison between the two censuses with respect to the total dollar volume of receipts, as establishments in this range constitute an insignificant fraction of the service receipts volume.

(2) The adoption of the mail canvass method in the 1954 Business Census, described under METHOD OF ENUMERATION above, made it feasible to extend the coverage of the census to "nonrecognizable" establishments and those closed part of the year because of the seasonal nature of their activities. In the 1948 and previous Business Censuses, coverage was limited to places which were "recognizable" as business establishments to enumerators who systematically canvassed all city blocks, roads, highways, etc. The use of the BOASI mailing lists and IRS records, referred to above, for the 1954 Census made this limitation unnecessary and resulted in the addition to the census coverage

of "nonrecognizable" businesses; e. g., businesses operated from homes or from desk space rented in offices; businesses operated from telephone listings; businesses operated on an itinerant basis, etc. Most of the "nonrecognizable" cases in the 1954 Census are classified in the business service and miscellaneous repair service categories (see KIND-OF-BUSINESS CLASSIFICATION, below). For most kinds of business the effect of the inclusion of "nonrecognizables" is greater on the count of establishments than on the volume of receipts. Where the effect on a particular kind of business is important it is noted in the section on KIND-OF-BUSINESS CLASSIFICATION below.

(3) The change in method of enumeration also resulted in the inclusion in the 1954 Business Census of a number of establishments which were in business a part of 1954 but not at the end of 1954. In the 1948 and previous Business Censuses, the coverage of establishments (except for those of large multiunit organizations for which special canvass procedures were used) was substantially limited to places which, at the end of the year, were still in business. In the 1954 Census, however, the inclusion of establishments not in business at the end of the year was possible to the extent that such establishments were included in the active files of the Internal Revenue Service used for mailing list purposes or to the extent that they were identified in the records used for the "nonemployer" universe. In both 1954 and previous Business Censuses, the count of establishments is limited to those in business at the end of the year. Other items of data in the 1954 Census, however, include figures for part year establishments not in business at the close of the year. The extent to which data for such establishments have been included in the 1954 Census figures will be noted in later publications.

(4) Another important difference between the two censuses is in the treatment of sales, excise, and amusement taxes levied directly on the consumer. In the 1948 Census of Business such taxes were not included in the total receipts of service establishments, whereas they were included in the 1954 Census. The overall effect of this change, however, is believed to be small, as most State service and sales taxes averaged about two or three percent. The most important segment of service trade affected by this difference is the amusement trades. In this field Federal and local tax rates tend to be comparatively high, and the 1954 receipts data will be correspondingly greater.

(5) Comparability of 1948 and 1954 Business Census results is also affected by a change in concept which affects volume of receipts in the Selected Service Trades, in "Business Services" and in "Advertising Agencies." In 1948 receipts of advertising agencies were included net of media costs, whereas in 1954 their receipts included media costs. This results in an estimated increase of over $2 billion in total receipts for the United States.

(6) Comparison of the two Censuses is further qualified by the fact that the scope of the 1954 Census was expanded to include the following kinds of business: Motion picture production, distribution, and allied services; trailer parks; and membership golf and country clubs.

## CONFIDENTIALITY OF DATA

In accordance with Census law, any data which would disclose the operations of an individual establishment or business organization are not published. The number of establishments in a kind of business is not considered a disclosure by Census rules, so that this item is shown in instances where other items of information for the same kind of business or locality are suppressed.

## EXPLANATION OF TERMS

Establishments.—Census of Business figures represent a summary of reports for individual "establishments" rather than "companies." A separate report was obtained for each location where business was conducted, including each location of multiunit organizations. Each report in the Census was tabulated in accordance with the physical location at which the business was conducted. For purposes of the count of establishments, those which conducted business at some time during 1954 but went out of business before the end of the year are excluded; however, other data pertaining to such establishments are included in the tabulations. (See COMPARISON OF 1948 AND 1954 CENSUSES, Item 3, above.)

Although the tabulations of the Census are on an establishment rather than ownership basis, in certain tables the establishment figures are grouped into ownership categories. This is the case in the bulletin "Single Units and Multiunits" and in a planned company statistics bulletin covering company activities in all parts of the 1954 Censuses of Business, Manufactures, and Mineral Industries.

Where two or more activities were carried on under the same ownership at a single establishment, the entire establishment was classified on the basis of its major activity and all data for it included in that classification. However, when these activities were conducted by separate business entities, each entity was treated as an establishment. Thus, a leased department in a department store (such as a beauty shop) was treated as a separate establishment and is included in these tabulations on the basis of its activities rather than as a part of the store within which it operates.

This bulletin does not include figures for those locations of a multiunit organization which service, or are auxiliary to, the operating establishments of the organization, such as separate garages, administrative offices, etc. Information for this type of unit will be included in later 1954 Census of Business publications. In the 1948 Business Census, figures for such units were included in the Service Trade tabulations, but not separately identified.

Receipts.—Receipts are defined to include total receipts from customers during 1954, after deduction of refunds or allowances to customers. Receipts include receipts from sales of merchandise as well as from services to customers but exclude amounts other than those received from customers, such as income from investments, rental of real estate, etc. They include the amount of local and State sales taxes, amusement taxes, or Federal excise taxes which are collected by the establishment directly from customers, and paid directly by the establishment to a local, State, or Federal taxing agency. Excise and other taxes which are paid by the manufacturer or wholesaler and passed along to the service establishment are also included.

The receipts figures, therefore, represent total receipts and sales of all establishments primarily engaged in the selected service trades. They do not include service receipts of retailers, manufacturers, wholesalers, and other businesses whose primary activity is other than in the selected service trades. They do, however, include receipts other than from service activities (e. g., sales of merchandise at wholesale or retail) by establishments primarily engaged in the selected service trades.

Payroll, entire year.—Payroll includes all forms of compensation (salaries, wages, commissions, bonuses, and payments in kind) paid during the year to all employees. For corporations, it includes amounts paid to officers and executives; however it does not include compensation of proprietors or of partners of unincorporated businesses. Included in payroll are the value of payments in kind, such as free meals, lodgings, etc., received by employees from their employers but not amounts received by employees as tips, etc. Payroll is reported before deductions for Social Security, income tax, insurance dues, etc.

Payroll—Workweek ended nearest November 15.—This item consists of payroll, as defined above, which was paid to persons on the payroll in the pay period ended nearest November 15, 1954. Establishments whose payroll period was other than a week were requested to adjust the figures to a weekly basis.

Paid employees—Workweek ended nearest November 15.—Paid employees consist of the number of employees, including salaried officers and executives of corporations, who were on the payroll for the workweek ended nearest November 15.

"Full workweek" employees.—"Full workweek" employees include employees, whether regular or seasonal who, for the specified pay period, were paid for working at least the number of hours typically worked in a week by employees of the reporting establishment. All other employees paid during that workweek were reported as part-workweek employees.

Proprietors of unincorporated businesses.—Includes owners or partners of unincorporated businesses who devoted the major portion of their time to the operation of the business.

## CITY SIZE

Each establishment included in the 1954 Census of Business was classified into one of nine city-size groups, based on the number of inhabitants in the city in which the establishment was located. City size was determined by the 1950 Census of Population count, except for places which had special censuses taken by the Bureau of the Census between April 1, 1950, and September 15, 1954. The group entitled "Remainder of United States" included all establishments located in incorporated cities of less than 2,500 inhabitants, and in rural areas.

## STANDARD METROPOLITAN AREA CONCEPT

In addition to those for States, counties, and cities, Census of Business statistics are presented for standard metropolitan areas. These are areas which have been defined and established cooperatively by a number of interested Federal agencies under the direction of the Bureau of the Budget for purposes of compilation and presentation of a wide variety of statistical data on a uniform area basis.

The general concept adopted in defining a standard metropolitan area was that of an integrated economic area with a large volume of daily travel and communication between a central city of 50,000 inhabitants or more and the outlying parts of the area. This resulted in an area considerably more restricted, especially for the larger cities, than the "market" or "trading" area. Each area (except in New England) consists of one or more entire counties. In New England, metropolitan areas have been defined on a town basis rather than a county basis. A complete statement of the principles adopted as a guide in applying this general concept to the definition of individual areas will be found in a document issued by the Bureau of the Budget, Executive Office of the President, dated July 28, 1950, entitled "Standard Metropolitan Area Definitions."

The 173 standard metropolitan areas in continental United States and Hawaii for which 1954 Census of Business data are included in this volume are those defined by the Bureau of the Budget as of June 8, 1954. (See list on page 13.)

## KIND-OF-BUSINESS CLASSIFICATION

Each establishment was assigned a kind-of-business classification, in accordance with the provisions of the 1949 edition of the Standard Industrial Classification Manual, as subsequently amended by the Bureau of the Budget for use in the 1954 Census of Business.

The problem of classification in the 1954 Census was somewhat complicated by the fact that establishments similar in character could have received different type Census forms on which to report their 1954 businesses. This occurred because the classification information on which the mailing of forms was based was not always complete or sufficiently up to date in terms of what was needed for the final classification. While each of the report forms required the establishment to designate its kind of business, the supporting information which was requested necessarily varied from form to form. In some cases, this undoubtedly resulted in different classifications being assigned similar establishments.

Because "nonemployers" were not required to prepare Census reports (information for them having been furnished by the Internal Revenue Service from 1954 tax returns), the system described above could not be used in classifying their returns. For the "nonemployers" the only information available for classification was the designation or description of the establishment entered on the tax form by the proprietor.

The difference in information collected and in the method of classifying establishments in this Census as referred to above led to some differences in the classification assigned as compared with the one which would have resulted from the system used in previous censuses. Although a precise measure of these differences is not available at this time, it is likely that in most kinds of business the differences in the classifications assigned tended to offset each other.

Known factors which might cause differences in specific kinds of business as compared with past censuses have been noted in the kind-of-business descriptions below.

## KIND-OF-BUSINESS DESCRIPTIONS

Kind-of-business definitions are presented below under each of the major groups constituting the Selected Service Trades. In addition, discussions have been included for those kinds of business for which special problems existed.

### Personal Services

The kinds of business classified within this group are the same as those included in the Standard Industrial Classification Manual as "Personal Services," major group 72.

Barber shops.—Establishments primarily engaged in furnishing barber services, with the exception of those shops owned by another business, and operated as a part of that business, such as a retail store or hotel. However, barber shop concessions (owned and operated independently), except concessions on trains and steamships, are included in this classification. Barber colleges are also included.

Beauty shops.—Establishments primarily engaged in furnishing beauty services, with the exception of those shops owned by another business, and operated as a part of that business, such as a department store, women's ready-to-wear store, or hotel. The kinds of business classified within this group in the 1954 Census of Business are the same as those classified in the Standard Industrial Classification Manual as "Miscellaneous Business Services," major group 73, with the exception of "Accounting, Auditing, and Bookkeeping Services," group 737, which is not included in the Census of Business.

The effect on coverage of the use of administrative records in the 1954 Census in place of the personal enumeration used in

previous censuses is particularly noticeable for business service establishments. For such establishments, dollar volume and number of establishments are both affected to such an extent as to make comparisons with previous censuses difficult. The degree of comparability is determined by the extent to which establishments in a particular kind of business were "non-recognizable" by personal enumeration in previous censuses.

For certain types of service establishments such as printing brokers, stamp trading and premium scrip companies, and advertising agencies the total receipts figures in this report include monies and merchandise transferred incidental to the services they provide.

For business service organizations which receive their revenues through a main office, but maintain service branches at other geographical locations, no attempt was made to allocate receipts to service branch locations. Consequently, such offices have been classified as auxiliary offices, and their employment and payroll are not included in this report. Some examples of kinds of business where this occurs are news syndicates, research laboratories, and business marketing and management consultants, and newspaper, radio, television advertising representatives.

Advertising agencies.—Establishments primarily engaged in contracting for space in magazines, newspapers, periodicals; for radio or television time; or for other advertising media on a commission or fee basis. Receipts include commissions and media costs even when such fees are paid directly to the media involved; service fees; and production charges. Establishments which write advertising copy or do commercial art work but do not place advertising with media are not included in the Census of Business.

Outdoor advertising services.—Establishments primarily engaged in the preparation and presentation of poster displays and painted and electric spectacular displays (principally outdoors) on panels, bulletins, and frames. Such establishments may (as incidental services ) construct, repair, and maintain display boards and may post advertisements. Shops which make neon signs to order are included in the Census of Manufactures.

Miscellaneous advertising.—Establishments primarily engaged in furnishing advertising services not elsewhere classified, such as advertising research service, handbill distribution, the distribution of samples, and transportation advertising. Establishments which are primarily engaged in writing advertising copy or commercial art work are not included in the Census of Business.

Auctioneers' establishments (service only).—Establishments primarily engaged in selling merchandise or real estate for others at auction on a fee or commission basis. Receipts of these establishments represent commissions and fees. Establishments primarily engaged in selling their own or consignment merchandise at auction to household consumers are classified in Retail Trade. ### Hotels, Motels, Tourist Courts, Camps

This group consists of establishments engaged in providing lodgings or lodgings and meals to the general public except (1) rooming and boarding houses, (2) hotels which provide accommodations only for "permanent" residents, and (3) "tourist homes." Apartment or residential hotels which provide accommodations for transients have been included in the census.

Although the techniques used in taking the 1954 Census could have resulted in some differences in classification and coverage of establishments in this group as comapred with previous censuses, these differences generally did not importantly affect comparability with previous census results. Outlined below are the main problems stemming from the use of administrative records in the 1954 Census for these kinds of business:

(1) In the 1954 Census, a different report form was used for employer establishments which were classified as "hotels" in the records of the Bureau of Old Age and Survivors Insurance (BOASI) from that used for establishments which in the BOASI

records were classified as "motels," "trailer parks" or "sporting and recreation camps." Because of the lack of entirely objective criteria for distinguishing between these two categories of establishments, it is possible that similar establishments could have been assigned different classifications depending on the report form used. In previous censuses, where the classification was made by enumerators, there was a similar problem of classification. It is possible that enumerator assigned classifications in previous censuses did not coincide with the classifications assigned in the 1954 Census for the same establishments.

(2) In order to account for hotels operated by firms classified in the real estate business by BOASI, hotel report forms were mailed to all BOASI reporting units with eight or more employees in that classification. However, reporting units with fewer than eight employees were not canvassed in the Census. To the extent that these units may have operated hotels or other lodging places, such places would not have been included in the Census.

(3) In the 1954 Census, the classification of establishments with no paid employees was based on a brief kind-of-business description entered on the tax form. The necessity for relying on this description could have resulted in the exclusion of some establishments which might properly belong in the scope of the census. If, for example, in filing an income tax report, the proprietor of a lodging place at a resort area described his business as operating a rooming or boarding home, the establishment would have been omitted from the census as being out of scope. In 1948, using personal enumeration, the same establishment could have been classified by the Census enumerator as a hotel if it had a sign designating itself as a hotel. The effect on the statistics of dollar volume of hotel business of establishments where this and similar problems of classification are likely to occur would, however, be slight since these are typically small establishments.

(4) It is likely that, in the case of establishments with no paid employment, some establishments, which by 1948 Census rules would have been classified as "eating" or "drinking" places, were classified in the 1954 Census as hotels. This could have resulted because, for establishments with no paid employees, there was no means for applying the 1948 Census rule which excluded from the hotel category those establishments with fewer than 25 guest rooms which had less than 5 percent of receipts from room rental. As this difference in procedure is limited to small establishments, i.e., those with no paid employment, the effect is more apparent in count of establishment than in receipts or other figures shown in the Census reports. The effect of the difference in 1948 and 1954 classification procedures on the count of hotels is particularly marked in the case of Pennsylvania.

In the 1954 Census, Sporting and Recreational Camps were added to the scope of the Census of Business. Because of difficulties in making definitive classifications in all cases, some of these establishments in previous censuses probably were classified as hotels or motels.

Hotels.—This classification consists of establishments known as hotels, engaged in providing lodging, or lodging and meals, to the general public. In 1954, hotels were included regardless of the number of guest rooms; in 1948 hotels with less than 6 rooms were omitted. Hotels operated by membership organizations, but open to the public, and apartment hotels which provide accommodations for transients are included. Rooming and boarding houses, private residences commonly known as tourist homes and apartment or residential hotels which provide no accommodations for transients are not included in the Census of Business.

Year-round hotels.—Hotels which normally are in operation at least 9 months of the year.

Seasonal hotels.—Hotels which normally are in operation less than 9 months of the year.

Motels, tourist courts.—This classification consists of establishments known as motels, tourist courts, tourist camps, or motor courts primarily engaged in providing accommodations in furnished cabins or similar structures. In 1954 motels and tourist courts were included regardless of the number of rental units; in 1948, motels and tourist courts with less than 3 rental units were omitted. Tourist homes (private residences furnishing lodging to motorists) are excluded from the census. Commercially operated sporting and recreational camps (such as boys' and girls' camps, fishing and hunting camps, and dude ranches) are separately classified.

Trailer parks.—This classification consists of establishments known as trailer parks, primarily engaged in renting trailer space and providing utilities such as water and electricity. Trailer parks were not included in the 1948 Census of Business.

Sporting, recreational camps.—This classification consists of commercially operated sporting or recreational camps providing lodging or lodging and meals. These include boys' and girls' camps, fishing and hunting camps, and dude ranches. Camps primarily receiving their financial support from subsidies, donations, contributions, etc., are not included. Summer day camps where the children return home each night are excluded as are also establishments operated by membership organizations and not open to the general public.
